about us

-

We are everyday essential beauty inspired by the passion of Founder & Creative Director, Ere Perez.

Ere grew up in Mexico with a traditional medicine man grandfather, and a mother with a flair for home remedies and beauty recipes.

Later, with a Bachelor's degree in nutrition and certifications in naturopathy, Bach flowers and acupuncture, Ere emigrated to Australia.

In 2002, Ere Perez Natural Cosmetics was born.

We are the alchemy of Australia's bountiful nature and eco lifestyle, with a dash of rich Mexican colour and vibrant culture.

We create innovate makeup and skincare for today's consumer seeking minimal, ethical, and healthy beauty. Our formulas feature unique superfood ingredients selected for their performance and skin-revitalising properties. We value simplicity and believe in a less-is-more philosophy.

Our 18 years of experience make us trusted leaders in delivering clean beauty. We are known for our stellar formulas and multitasking creations.

We celebrate the beauty you were born with.

values

-

Our products are not tested on animals and none of the ingredients in our formulations are required to undergo animal testing. We are certified cruelty free by PETA and Choose Cruelty Free Australia.

We are a predominantly vegan brand and do not use animal-derived ingredients with the exception of almond mascara which contains beeswax.

Our ingredients do not come from GMO sources.

We are signatories of the UN Global Compact and are committed to corporate sustainability principles regarding human rights, labour, environment and anti-corruption.

Ere Perez supports the sustainable production of palm oil by purchasing credits that supports these practices. Our tinted mascaras contain sustainably-sourced palm oil.

We are certified carbon neutral by The Carbon Reduction Institute. All greenhouse gas emissions are offset by funding carbon-neutral energy initiatives.

eco commitments

Creating refillable products that replace an insert pan into your existing product so you can save the planet from extra packaging.

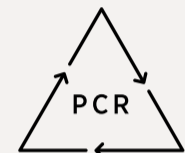

MULTI-USE

One product with many uses! By choosing a multitasker like a 2-in-1 or even 3-in-1, a lot of materials and resources are saved.

Items designed with as minimal impact on the environment as possible, with as little being thrown away in the life cycle of the product. Including recyclable packaging and biomaterials.

We are working towards the use of PCR (post-consumer recycled plastics) as much as possible. Our tubes are now made with PCR. This is a better choice to other plastics that cannot be recycled.

Replacing plastic in product packaging with an infinitely recyclable material like glass/aluminium. Using plastic-free biodegradable/compostable materials for postage and shipping.

INFINITE

Mono materials are single ingredient pieces such as 100% glass, carton or aluminium. This allows for easier dismantling and infinite recycling of packaging elements.

Choosing ingredients that are potent and nutritive but widely available. Avoiding ingredients that are rare or under threat from over-production.

NEUTRAL

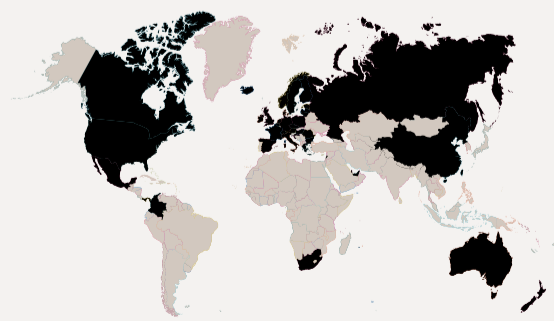

We have been certified carbon neutral since 2016, offsetting our carbon from all elements of production. Even our shipping is carbon neutral.
